

PRORICH

Combination of prebiotics & probiotics for cattle

Maintain a healthy balance
Promote growth and weight gain
Improve Immune system in cattle
Support muscle development and overall growth.

Benefits of probiotics in cattle

- PRORICH helps maintain a healthy balance of beneficial bacteria in the rumen and lower digestive tract.
- It enhances fiber digestion and improve the efficiency of feed utilization, leading to better nutrient absorption and overall feed efficiency.
- It can reduce the risk of digestive disorders such as acidosis and bloat by stabilizing rumen pH and promoting the fermentation of fiber.
- It supports the development and function of the immune system in cattle.
- It stimulates the production of beneficial compounds such as short-chain fatty acids and bacteriocins, which help inhibit the growth of harmful pathogens in the gut.
- It can enhance the production of immunoglobulins and cytokines, leading to a stronger immune response against infections and diseases.
- It have been shown to mitigate the negative effects of stress in cattle, such as transportation, weaning, and changes in diet.
- It helps stabilize the gut microbiota during periods of stress, reducing the risk of digestive upsets and maintaining overall health and performance.
- It can promote growth and weight gain in cattle by improving nutrient utilization and feed efficiency.
- It enhances the production of beneficial metabolites, such as vitamins and amino acids, which support muscle development and overall growth.

Composition

1. Fructo-oligosaccharides (FOS) and inulin
2. Mannan oligosaccharides (MOS)
3. Bacillus species
4. Lactobacillus species

Dosage

Cattle : 250 Grams to 500 Grams per tonne of Feed.

Animal Feed Supplement.

Not for human or medicinal use

The Product Is Free From Chloramphenicol Nitrofuran Antibiotics Melamine By product Of Swine Bovine And Any Other Genetically Modified Organism

Product of India
Manufactured & Marketed by

Biozona

India Private Limited
