

PRORICH

Combination of prebiotics & probiotics for poultry

Promote gut health

Enhance immune function

Improve nutrient absorption

Probiotics are live microorganisms contributes in poultry and livestock farming, probiotics are often used to promote gut health, improve nutrient absorption, enhance immune function, and reduce the colonization of harmful pathogens.

PRORICH are non-digestible food ingredients that selectively stimulate the growth and/or activity of beneficial bacteria in the gut. Unlike probiotics, which are live microorganisms, prebiotics are typically carbohydrates that serve as food for beneficial gut bacteria

Benefits of probiotics in Poultry

- Improved feed conversion ratio
- Enhanced growth performance
- Reduced incidence of digestive disorders such as diarrhea and enteritis
- Enhanced and maintain consistent immunity
- Improved gut health and integrity
- Enhanced nutrient utilization
- Modulation of the gut microbiota composition

Enriched mechanisms of action and effects on gut health and performance.

Composition

1. Fructo-oligosaccharides (FOS) and inulin
2. Mannan oligosaccharides (MOS)
3. Bacillus species
4. Lactobacillus species

Dosage

Poultry : 250 Grams to 500 Grams per tonne of feed

Animal Feed Supplement.

Not for human or medicinal use

The Product Is Free From Chloramphenicol Nitrofurantoin Antibiotics Melamine By product Of Swine Bovine And Any Other Genetically Modified Organism

Product of India
Manufactured & Marketed by

The logo for Biozona features the word "Biozona" in a stylized font. The "Bio" is in blue and the "zona" is in green. Above the "o" in "Bio" are several small colored dots (red, yellow, green, blue). The "z" in "zona" is stylized to resemble a bird in flight.
