

Diarotrol LFC

An Authenticate loose dropping controller

Diarrhea in poultry can be caused by various reason like, Nutritional imbalance, Microbial factors, High intake of Minerals, Water quality, Climate factors, Poor quality of dietary fat or rancid fat, During Peak production, Excess protein, Various stress, Over dosage of Salts, Excess usage of Antibiotics and Medicines, Excessive Mycotoxins and Mold , Internal organs damage and various other reason.

Diarrhea also leads various other issues, Poor digestion, Bioavailability of Nutritional factors, lack of Immunity, impact in Growth and productivity in worst case it will lead increase in Mortality

Diarotrol LFC is a well advanced formulation to consistently improve and maintain the gut health, Control Pathogens and allow beneficial microbes colony in gut, Improve digestion and Immunity. Control diseases it also support the birds perform better during Peak production.

Diarotrol LFC contributes to maintain litter condition in dry form which reduces Fly Larvae, Ammonia, Nitrate and Pathogens level in Litter and Keep the birds healthy.

Suitability :

- During Peak production loose dropping for Commercial Layers and Breeders.
- Entire lifecycle for Broilers.
- Before and after Vaccination and Medication.
- Poor Raw material Quality and Mycotoxin and rancidity issues.
- Excessive minerals and salt in formula.
- High protein diet.
- During high water intake.

causes of diarrhea

Peak production

Vaccination

Multiple stress

Poor gut health

Severe medications

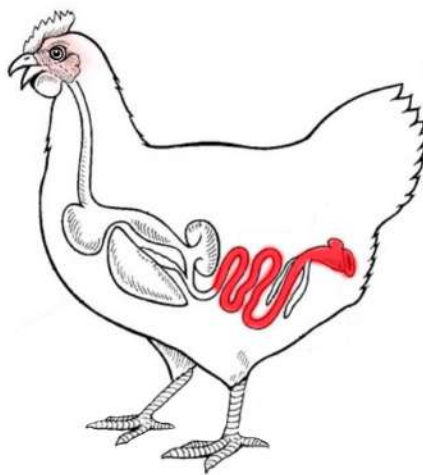

Excess protein in Feed

Excessive Antibiotics usage

Viral and Bacterial infection

Over dosage of Salt & Minerals

High Mycotoxin & Mold presence in Feed

Types of chicken poops

Yellow poop

Corn diet or Coccidiosis

Orange poop

Intestine Lining Shedding

White poop

Too much water or gumboro disease

Black poop

Black treats or Internal Bleeding

Red poop

Intestine Lining or Bloody stool

Green poop

Too many greens OR Marek's disease

Clear poop

Excess water or Vent gleet

Benefits :

1. Diarotrol LFC instantly inhibits Pathogens in the Gut which is core reason for diarrhea.
2. Diarotrol LFC functions in re-absorption of water.
3. Improves digestibility and Nutritional bioavailability.
4. Improves overall birds health and immunity.
5. Quick recovery and optimum litter quality.
6. Litter quality under shed in dry form which reduces the Ammonia level and Fly population.
7. Inhibits Pathogens load in litter and reduces possibility of spreading diseases.

Dosage :

Prevention : 1.5 Kg per Ton of Feed.

Growers and Peak production period (22nd to 30th. Weeks) : 2 Kg per Ton of Feed.

Treatment (Several Loose dropping) : 2.5 Kg per Ton of Feed for 3 Weeks and 1.5 Kg per Ton of Feed for maintenance.

Product of India
Manufactured and Marketed by

Biozona
India Private Limited

No 11, VOC Street, Ponmalaipatti,
Tiruchirappalli - 620004, Tamilnadu, India.

Composition :

Curcuma longa, Allium Sativum , Combination of instantly acting Selective Phytochemicals, Saccromyces Cereviease, Xylanase and Gut Probiotics.
