

TURCUMA

*Antiviral, Antibacterial and Antioxidant, Helps Prevent Coccidiosis
Turmeric Oil Energy 9000 Kcal/Kg | Curcumin 15%*

TURCUMA is a concentrated Turmeric Oil with superior medicinal value and helps to maintain immunity consistently. TURCUMA is a proven antibiotic growth promoter. TURCUMA functions as a natural coloring agent which attracts the Livestock, Poultry and Aquatic animals.

What is TURCUMA

TURCUMA is the byproduct after solvent extraction from turmeric. The active substances in the TURCUMA have a wide spectrum of biological activities including antioxidant, antibacterial, antifungal, antiprotozoal, antiviral, anticoccidial and anti-inflammatory properties.

Benefits:

«Greater body weight gain

«Optimise Feed Conversion Ratio (FCR) in broilers.

«Supplementation of layer diet with TURCUMA meal increased egg production weight, mass and increased the yolk weight and yolk index.

«Studies also show that TURCUMA has the ability to stimulate the digestive system, increase the secretion of intestinal lipases, amylase, trypsin and chymotrypsin enzymes hence boosting digestibility.

«Dietary supplementation of TURCUMA ameliorated the harmful effect of Aflatoxin B1 on the body's immune system, showing the humoral immune stimulatory potential in poultry.

Dosage:

Broilers, Commercial Layers and Breeders

In all stages of growth : 200 ml to 400 ml / Ton feed

Fish and Shrimp : 200 ml to 500 ml per ton of feed
