

AMINOWASH Liquid

YUCCA & PROBIOTICS BASED AMMONIA CONTROLLER

The unique and optimized combination of AMINOWASH liquid provides adequate colony forming units of beneficial, essential bacteria & digestive enzymes to help breakdown sludge, food waste particles to improve digestion & to reduce ammonia & hydrogen sulphide. An exceptional blend also enables the beneficial bacteria to stabilize in alimentary tract to prevent the growth of Pathogenic bacteria.

Benefits

- Degrades Sludge.
- Eliminates Organic Waste.
- Quick In Absorbing Toxic Gases.
- Helps To Accelerate Nitrogen Cycle.
- Improves Water Quality and health environment.
- Reduces Ammonia and Nitrite instantly in the pond.
- Prevent further formation of Ammonia and Nitrite for long time.

Composition

Yucca schidegere, Bacillus spp, Nitrosomonas and Streptococcus faecium.

Usage Instructions

Immerse in pond water for not more than 2 hours and apply.

Use once in every 10 to 15 days to maintain optimum ammonia levels depending upon the season and water quality.

Dosage : Fish pond

High level of Ammonia : 500 to 750 ml / acre in 5 to 7 feet depth.

Medium level of Ammonia : 300 to 500 ml / acre in 5 to 7 feet depth.

(We recommend checking the water quality and following the technician's advice)

Not for human, Cat & Dog

Product of India

Aqua culture based product

THE PRODUCT IS FREE FROM CHLORAMPHENICOL, NITROFURAN, ANTIBIOTICS, MELAMINE, BY-PRODUCT OF SWINE/BOUVINE AND ANY OTHER GENETICALLY MODIFIED ORGANISM.

Manufactured by :

Biozona
