

BIOPLANK Powder

Probiotics and Phytoplankton cultures

Benefits

- To increase dissolved oxygen and to decrease toxic gases like ammonia, nitrite, hydrogen sulfide, methane, carbon dioxide in pond water.
- To stabilize pond water quality and to lower the content of toxic compounds.
- To make use of plankton as a natural feed.
- To provide shade and to decrease cannibalism.
- To increase and stabilize water temperature.
- To minimize pathogenic and unwanted microbial population by competing with the available nutrients in the water.
- So, Phytoplankton plays a significant role in stabilizing the whole pond ecosystem and in minimizing the fluctuations of water quality.

Composition

Particulars	Specifications
Blend of Probiotics	10 Billion CFU / Gram
Vitamin mix	5%
Blend of minerals	50%
Seaweed extract	Q.S
Other plankton Stimulators	Q.S

Dosage

600 grams to 1000 grams per acre

Product of India

Manufactured and Marketed by
