

NIYANTRAN LIQUID

YUCCA BASED AMMONIA CONTROLLER

The unique and optimized combination of NIYANTRAN LIQUID provides adequate colony forming units of beneficial, essential bacteria & digestive enzymes to help breakdown sludge, food waste particles to improve digestion & to reduce ammonia & hydrogen sulphide. An exceptional blend also enables the beneficial bacteria to stabilize in alimentary tract to prevent the growth of Pathogenic bacteria

- Dosage** : Fish pond
- High level of Ammonia : 500 to 750 ml / Acre in 5 to 7 feet depth
- Medium level of Ammonia : 300 to 500 ml / Acre in 5 to 7 feet depth
- (We recommend checking the water quality and following the technician's

Benefits:

- Reduces Ammonia and Nitrite instantly in the pond.
- Prevent further formation of Ammonia and Nitrite for long time.
- Quick In Absorbing Toxic Gases.
- Eliminates Organic Waste.
- Degrades Sludge.
- Improves Water Quality and health environment.
- Helps To Accelerate Nitrogen Cycle.

Usage Instructions :

Immerse in pond water for not more than 2 hours and apply.

Use once in every 10 to 15 days to maintain optimum ammonia levels depending upon the season and water quality.

Composition:

Yucca schidegere, Bacillus spp, Nitrosomonas and Streptococcus faecium

Not for human, Cat & Dog

Aqua culture based product

THE PRODUCT IS FREE FROM CHLORAMPHENICOL, NITROFURAN, ANTIBIOTICS, MELAMINE, BY-PRODUCT OF SWINE/BOUVINE AND ANY OTHER GENETICALLY MODIFIED ORGANISM.

Manufactured by :

Biozona
