

# SP-TOX AQUA

Ideal Toxin Management

SP TOX AQUA has an enormous surface area so it adsorb wide range of toxins in the intestine. It is a multi-component toxin binder specially developed as a complete solution to the Mycotoxins problem. Selected ingredients binds wide range of various toxins presence in the Feed.

## Benefits:

- To adsorb a wide range of mycotoxins.
- To protect and rehabilitates the liver and kidney.
- To reduce immunosuppression caused by mycotoxin.
- To Improve Aquatic animals health through increased resistance to disease .
- To improve the immunity and feed intake.
- It formulated with selected high quantity ingredients to perform as a broad spectrum.
- It supports to control chemical toxicity due to pesticides and heavy metals.
- To maximize feed conversion and improves overall performance.

## Key features:

- SP TOX AQUA Formulated with selected high quality ingredients to perform as a broad spectrum Mycotoxin absorbent in challenge condition.
- Its largest surface area is to bind extreme and various toxins in wide range.
- The unique ingredients support to control chemical toxicity due to pesticides and heavy metals .
- Selected silicates to adsorb both polar and dipolar mycotoxins.
- Maximizes feed conversion and improves overall performance.
- SP TOX AQUA does not absorb vitamins, minerals and other nutrients it reduces mortality & secondary bacterial diseases problem.
- Protects the liver against the damage and mobilizes the fat accumulated in the liver.

## Impact of toxins :

- Reduction of feed intake .
- High impact in FCR and productivity.
- Reduces nutritional adsorption.
- Affects Fish and Shrimp immunity and overall health and performance.

## Composition:

Specially preserved silicates, Mannan oligosaccharide (MOS), Activated Charcoal, Organic Acids, Phytochemical derivatives and the blend of adsorbing components.

## Dosage :

Fish and Shrimp : 1 Kg per ton of feed at moisture level < 15%  
1.5 Kg to 2 Kgs per ton of feed at moisture level > 15%
