

WS PRO – 5B

A complete solution for water and soil for Fish

The Organic load, unconsumed feed, excessive feed, faecal matter, moulted Exo-skeleton, dead algae, which is rich in protein and carbohydrate, settles in the bottom and produces toxic gases, ammonia / hydrogen sulphide. This deteriorates the healthy environment and causes damages to the Fish culture and enhances the proliferation of pathogenic bacterial population. This contributes to the pollution of the pond bottom and lead to disease outbreak.

WS PRO – 5B is an innovative and unique blend of biodegrading microbes for water and soil which allows the activation of large number of viable probiotics for use in aquaculture ponds.

Benefits

- WS PRO – 5B reduces toxic gases like Ammonia / Nitrite / H₂S build up in the pond.
- WS PRO – 5B produces variety of antibacterial, Anto fungal substances, which suppresses growth of pathogenic microbes like Vibrio, Salmonella, Aeromonas and E. Coli in the pond environment.
- WS PRO – 5B eliminates malodorous in the pond as well as geosmin, which causes muddy smell in Fish.
- WS PRO – 5B stabilizes pH, alkalinity and algal blooms.
- WS PRO – 5B effective in high range of salinity (0 – 50ppt) and pH (6.5 – 9.5).
- WS PRO – 5B promoting the growth of healthy Phyto / Zoo plankton.
- WS PRO – 5B reduces organic load (Blacksoil) by producing large amount of waste degrading enzymes like amylase, protease, lipase and cellulose.
- WS PRO – 5B oxidizes ammonia to form nitrites and nitrates.
- WS PRO – 5B helps in maintaining the pond eco by natural microbe's growth during higher stockings, increased survival and yields.
- WS PRO – 5B Promotes faster growth and lesser counts / per kg in Fishes.
- WS PRO – 5B reduces number of water changes between crops.

Composition:

Bacillus Subtilis, Bacillus Megaterium, Bacillus licheniformis, Nitrosomonas SPPS, Nitrobacter SPPS, Rhodobacter SPPS, Saccharomyces cerevisiae, Lactobacillus Lactis, P. Pantotrophus, Rhodococcus SPPS, Cellolummonas SPPS and Psuedomonas SPPS, HalobacteriumSpp etc.

Direction to use :

Take a sufficient quantity of WS PRO 5B and mix with sand or pond water and apply all over the pond in the morning hours. Make sure you apply early in the morning during the summer season.

Dosage :

Fish pond

Moderate water quality : 200 to 350 grams per acre in 5 to 7 feet depth .

Poor water quality : 350 to 550 grams per acre in 5 to 7 feet depth .

Shrimp pond : 500 to 1,000 grams per acre in 5 to 7 feet depth depending upon the water quality .
Repeat the same as per technician advice.

Not for human, Cat & Dog

Aqua culture based product

THE PRODUCT IS FREE FROM CHLORAMPHENICOL, NITROFURAN, ANTIBIOTICS, MELAMINE, BY-PRODUCT OF SWINE/BOUVINE AND ANY OTHER GENETICALLY MODIFIED ORGANISM.

Manufactured by :

Biozona
India Private Limited

No 11, VOC Street, Ponmalaipatti,
Tiruchirappalli - 620004,
Tamilnadu,India.
